DETAILED ACTION

Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance:

Applicant's argument with respect to amended claims is persuasive that relevant prior art does not teach or suggest a plurality of optical fiber spans obtained from different fibers and void of zero spin rate sites being joined or optically linked together in combination with rest of the limitations or a method of making the same since the portion where fiber spans are joined together (Bohnert) or the portion where the helicity changes between fiber spans (Evans) has a zero spin rate. This is an improvement upon prior art and critical to the invention because having fiber sites of zero spin rate is detrimental for the PMD of the fiber because there is an increase in the effective birefringence seen by the pulse and thus a higher contribution for PMD as pointed out by applicant.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
